During manufacture and fabrication for our projects, we have system in place to manage our Quality Assurance from the start to the completion of each project. Comprehensive reports are collated and submitted to our clients at the completion of the project, documenting each step of the process and providing assurance to our clients that their completed product is of the highest quality standard.

Tradesman Qualifications (Macro Tests)

We will be supplying a third-party certificate showing our tradesman are qualified to complete the fabrication to AS/NZS 1554.1.SP.

WPQR's and WPS's

Our Welding Procedure Qualification Records will be prepared by a qualified third party. These procedures will then be followed by Welding Procedure Specifications.

NDT Testing

Non-Destructive Testing will be performed and reported by a third party and we will pass on their compliance reports. All reports will specify the corresponding WPS numbers.

Steel Test Certificates

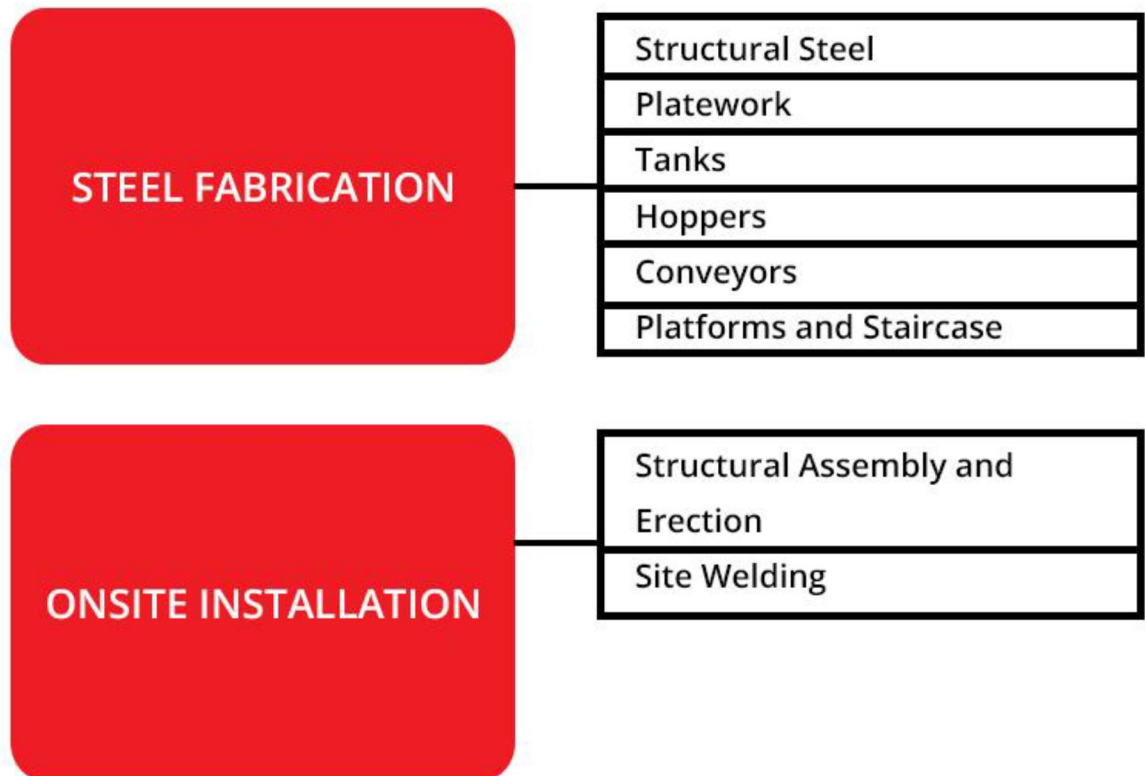

Steel Test Certificates for each order will be supplied showing that the material is Australian Made and conforms to Australian Standard.
